Top Skills

Network Engineering
Systems Design
System Architecture

Honors-Awards

1st Place - MAKEFORHYDERABAD
Makeathon

Murtaza Ahmed

Undergrad Engineer | Distributed Systems, ML Systems & Infra
Hyderabad, Telangana, India

Summary

Focusing on AI infrastructure, particularly GPU cluster orchestration, inference systems, model routing, resource allocation and workload scheduling.

Experience

Muffakham Jah College of Engineering & Technology
8 months

Undergraduate Researcher (R&D Program)
March 2026 - Present (5 months)
Hyderabad, Telangana, India

Design and Implementation of an Adaptive Multi-Objective Policy Engine for Resilient Orchestration in Heterogeneous LLM Clusters

Undergraduate Research Assistant - Department of Mechanical Engineering
December 2025 - Present (8 months)
Hyderabad

- Selected for an institution-funded R&D program under faculty supervision
- Built a complete edge AI system on NVIDIA Jetson Nano 4GB Developer Kit, integrating an IMX719 camera and soil sensors for real-time field operation
- Developed the on-device inference pipeline
- Executed real-time inference under compute and memory constraints
- Achieved 40–70 ms latency (14–20 FPS) using TensorRT (FP16)
- Processed camera and sensor data continuously at 5–10 Hz with low-latency performance
- Designed a stable execution loop enabling reliable operation over 4–6 hour field deployments

Horizon Research Group
Technical Contributor (AI & ML)
April 2025 - July 2025 (4 months)

Education

Osmania University

Bachelor of Engineering - BE · (May 2028)

Muffakham Jah College of Engineering & Technology

International Indian School, Dammam
